Agastache hybrida

Magnificent first-year-flowering Agastache varieties that can best be grown as an annual plant. The varieties have a compact habit, ideal for pot and containers. Well-branched plants produce densely set flower spikes in 15 weeks after sowing.

Type First-year-flowering tender perennial
Use Border plant, landscaping, containers
Height 50-60 cm / 20-25 in.
Flowering season June - October, summer - late summer

Agastache hybrida

Agastache hybrida 'Arcado Pink' FSN

Arcado Pink is a very floriferous variety with lovely purple-pink flower spikes attracting butterflies and beneficial insects to the border. Excellent variety for sales of flowering container plants in spring. Fleuroselect Novelty 2010.

Agastache hybrida 'Astello Indigo' FSN

Aristocratic Agastache with stately spikes of indigo flowers which stands proudly above dark green foliage. Astello Indigo creates a beautiful sight when planted en masse in the border. Perfect in patio pots and containers. Compact and robust plants with a good disease resistance are easily to flower in various pot sizes for sales in spring and early summer. Fleuroselect Gold medal 2012.

We are member of Fleuroselect.

Fleuroselect Gold Medal, reproduction prohibited.

Fleuroselect Novelty, reproduction prohibited.

All-America Selections National Winner.

All-America Selections Regional Winner.

Award of Garden Merit of the Royal Horticultural Society.

Antirrhinum majus 'Lucky Lips' FSN

Snapdragon, Löwenmaul, Muffler

Tall Snapdragon 'Lucky Lips' will flower all summer long with spectacular large blooms on long spikes. The flowers have a distinctive contrasting purple-red and white colour. Gorgeous in borders and a very nice cut flower for home gardeners. Fleuroselect Novelty 2014.

Type Hardy annual
Use bedding, border and cut flower
Height 50-70 cm / 20-28 in.
Flowering season July - September, summer - late summer

Antirrhinum majus
'Lucky Lips' FSN

Antirrhinum majus 'Twist'

Half-hardy perennial treated as an annual. Base branching with the first stem upright, followed by numerous side stems, free blooming. Excellent bicolor varieties. Sow January-March indoors in colder climates and transplant outdoors after the last frost. Snapdragons prefer well-drained soil and a sunny position in the garden. Remove old flowers to lengthen the flowering period.

Type annual
Use bedding, border plant, cut flower
Height 50-60 cm / 20-24 in
Flowering season July - September, summer

Antirrhinum majus 'Cherry Twist' FSN

Upper lips in a bright, fruity cherry colour and lower lips of contrasting snow white

Antirrhinum majus 'Mango Twist' FSN

Upper lips bright scarlet with mango-coloured lower lips

Antirrhinum majus
'Cherry Twist' FSN

Antirrhinum majus
'Mango Twist' FSN

Amberboa muricata
'Desert Star'

Amberboa muricata 'Desert Star'

The elegant lilac flowers with a creamy centre look like cornflowers. Amberboa attracts many butterflies and bees. Quite easy to raise from a direct sowing and when grown in informal, sunny borders, flowering continues for months.

Type Annual
Use Border plant, landscaping, cut flower
Height 80-120 cm / 32-47 in.
Flowering season July - October, summer - late summer

Argemone platyceras

Prickly Poppy, Stachelmohn, Argémone

An amazing annual for white borders. The 10 cm / 4 in. large pure white satin flowers with dark red stamens carrying golden anthers, invite you for a closer look. But beware, every medal has two sides. The drawback of this one is the large number of spines on the leaves. Bees love the large single flowers: in dozens they visit the open flowers.

Type Annual
Use Border plant, landscaping
Height 30-40 cm / 12-16 in.
Flowering season June - September, summer

Argemone platyceras

Asperula orientalis

Blue woodruff, Aspérule azurée

Beautiful and graceful annual for any garden, flower bed or large container. Plants are covered in lavender-blue tubular flowers from early to late summer. Attractive plant for butterflies. Excellent in borders and large containers in partly shade or full sun on average moist soils.

Type Annual
Use Bedding plant, border plant
Height 30-40 cm / 12-16 in.
Flowering season June - September, summer

Asperula orientalis

Brachyscome iberidifolia 'Little Missy'

Swan River Daisy, Australisches Gänseblümchen

Compact plants with finely divided leaves and dozens of small flowers in a lovely soft lilac and sky blue shades. Beautiful bedding and pot plant, sow or plant in a sunny place and in moist but well drained soil.

Type Annual
Use Bedding, border plant
Height 15-30 cm / 6-12 in.
Flowering season July - September, summer

Brachyscome iberidifolia
'Little Missy'

Calamintha nepeta 'Marvelette' FSN

Mountain mint, Bergminze, Menthe de montagne.

The marvelous Marvelettes: two exciting varieties for a fantastic garden performance. Calamintha is an aromatic, culinary herb with great ornamental value. Marvelette Blue and White are first-year-flowering and hardy perennials. They will flower within 12 weeks from a spring sowing and will flower all summer long. Very well branched, no pinching or PGR's needed, compact plants suitable for growing in 10-12 cm / 4-5 in. pots. Both Marvelettes can be produced for early spring, summer and autumn sales. Easy in production and a great presentation at retail: floriferous pot plants for spring sales and durable, long flowering in borders and containers. Calamintha is a real pollinator friendly plant: attractive for all kinds of bees and beneficial insects. Both Marvelette Blue and White received high scores in the Fleuroselect trials, and in a close finish 'Marvelette Blue' won the prestigious Gold Medal.

Type	First-year-flowering perennial
Use	Bedding plant, containers, landscaping, herb
Height	35-50 cm / 12-20 in. Garden height: 25-30 cm / 10-12 in.
Flowering season	June - September, summer

Calamintha nepeta 'Marvelette Blue' FSN

Lilac-blue flowers. Fleuroselect Gold Medal 2016.

Calamintha nepeta 'Marvelette White' FSN

Clear white flowers. Fleuroselect Novelty 2015.

Calamintha nepeta
'Marvelette Blue' FSN

Calamintha nepeta
'Marvelette White' FSN

Calamintha nepeta
'Marvelette Blue & White' FSN

Calendula officinalis 'Calexis'

English Marigold, Ringelblume, Souci.

Calexis has novel cactus-flowers in brilliant colours combined with a sturdy, compact habit. The rolled petals form a cactus shaped flower with a contrasting dark brown centre. The well-branched plants perform well in pots in a cool season or early spring crop. Easy to grow in pot sizes 10-15 cm / 4-6 in. Great garden performance, Calexis works very well in mixed beds, mass plantings, edging and containers. We offer two cheerful colours for an eye-catching spring display on the retail bench.

Type	Annual
Use	Bedding plant, borders and containers
Height	30 cm / 12 in.
Flowering season	May - September, spring - summer

Calendula officinalis 'Calexis Orange' FSN

Showstopper with vibrant orange blooms. Fleuroselect Gold Medal 2019.

Calendula officinalis 'Calexis Yellow' FSN

Fresh yellow cactus-flower with a dark brown centre. Fleuroselect Novelty 2018.

Calendula officinalis
'Calexis Orange' FSN

Calendula officinalis
'Calexis Yellow' FSN

Centaurea cyanus 'Classic'

Cornflower, Bachelor's Button, Kornblume, Centaurée barbeau

Well-balanced and eye-catching mixtures for direct sowing in borders, cottage gardens and your cut flower patch. Sow in autumn or early spring and enjoy bunches of cornflowers in great bicolour tones that appeal to all home gardeners. We offer flower lovers three fabulous shade-mixtures in this exciting Classic series, as well as a mixture of all Classic shades combined.

Type	Hardy annual
Use	Border plant, landscaping, cut flower
Height	80-100 cm / 32-40 in.
Flowering season	May - September

Centaurea cyanus
'Classic Fantastic' FSN

Centaurea cyanus
'Classic Magic' FSN

Centaurea cyanus
'Classic Artistic Mix'

Centaurea cyanus
'Classic Romantic' FSN

Centaurea cyanus 'Classic Artistic Mix'

Impressive formula mixture of the following three separate shades. Excellent quality, all bicolours and frosted flowers.

Centaurea cyanus 'Classic Fantastic' FSN

Mixture of captivating blue shades, ranging from light heavenly blue to dark blue. The flowers are often in two shades of blue or have a dark center and lighter petals. Fleuroselect Novelty 2011.

Centaurea cyanus 'Classic Romantic' FSN

This harmonious mixture contains exceptional shades, from light mauve with a dark centre to flowers that are close to black with white tip on each petal. For magical borders and bouquets. Fleuroselect Novelty 2012.

Centaurea cyanus 'Classic Magic' FSN

Delightful mixture of charming pink and pretty rosy-red shades. The flowers are often in two shades of pink, or have a dark center and lighter petals. Many flowers are rosy-red and have white tips. By sowing this variety you add romance to your border and summer bouquets. Fleuroselect Novelty 2011.

Coreopsis tinctoria

Tickseed, Calliopsis, Mädchenauge

Coreopsis is an excellent cut flower and border plant as it mingles easily with other plants.

Type	Annual
Use	Border plant, landscaping, cut flower
Height	60-80 cm / 25-32 in.
Flowering season	July - September

Coreopsis tinctoria 'Roulette' FSN

Roulette is an easy-to-grow annual for direct seeding with dark brown-red flowers. Each flower has a second row of golden brown petals which creates a special effect. Fleuroselect Novelty 2009.

Coreopsis tinctoria
'Roulette' FSN

Coreopsis tinctoria
'Golden Roulette' FSN

Coreopsis tinctoria 'Golden Roulette' FSN

A cheerful Coreopsis with large double and semi-double golden-yellow blooms. Very good in sunny borders and for cutting. Fleuroselect Novelty 2014.

Cosmos bipinnatus 'Colours Unlimited'

Choice formula mixture including our top varieties - you won't find anything better anywhere else!

Cosmos bipinnatus
'Colours Unlimited'

Cosmos bipinnatus 'Cosimo'

Early flowering and dwarf Cosmos series in different colours. In our trials the Cosimo varieties are one of the first annuals in flower every year. The dwarf plant habit makes them suitable for use as bedding plant and in low borders, and also as patio plant. In this series we now offer four varieties and a mixture.

Type Annual
Use Bedding, border plant, cut flower
Height 50-60 cm / 20-25 in. Flowering season
Flowering season July - September, summer

Cosmos bipinnatus 'Cosimo Collarette' FSN

The semi double flowers are striped in pink and white.

Cosmos bipinnatus 'Cosimo Pink-White'

The colour pattern varies from light pink with white stripes to white with pink edges.

Cosmos bipinnatus 'Cosimo Purple Red' FSN

Rich, deep purple red.

Cosmos bipinnatus 'Cosimo Red-White' FSN

Bicoloured flowers, striped in purple red and white.

Cosmos bipinnatus
'Cosimo Collarette' FSN

Cosmos bipinnatus
'Cosimo Pink-White'

Cosmos bipinnatus
'Cosimo Purple Red' FSN

Cosmos bipinnatus
'Xsenia' FSN

Cosmos bipinnatus Dwarf Varieties

Dwarf and well branched Cosmos varieties for growing in containers; suitable for pot production in sizes 12-20 cm (5-8 in) for spring and summer sales. Their compact and floriferous habit make these varieties very suited for borders and containers of course, like all Cosmos, also for bouquets.

Type Annual
Use Bedding plant, containers and cut flower
Height 50-60 cm / 20-25 in.
Flowering season July - September, summer

Cosmos bipinnatus 'Capriola' FSN

The large flowers have an extraordinary colour pattern: white with a light rosy-red picotee and dark purple-red centre. The flowers have a beautiful round shape and some flowers have a second row of smaller petals. Early flowering and semi-dwarf plant. Fleuroselect Novelty 2015.

Cosmos bipinnatus 'Rubinato' FSN

Rubinato is more compact and has a well branched habit compared to Rubenza. Nice round shaped flowers have a dark red colour similar to Rubenza. Fleuroselect Novelty 2015.

Cosmos bipinnatus 'Xanthos' FSN

Cosmos: the sky is the limit, but Xanthos goes beyond. Cosmos Xanthos is an amazing Cosmos. This breeding breakthrough excited many visitors of the 2014 Fleuroselect trials. They had seen many Cosmos varieties before but never seen such a unique yellow Cosmos bipinnatus. Early flowering with round flowers, single and some with collarette in stunning soft yellow. Press-Award Plantarium 2015. Fleuroselect Gold Medal 2016.

Cosmos bipinnatus 'Xsenia' FSN

Another breakthrough Cosmos introduction with a new and remarkable colour: terracotta orange with rose edges. The tones change with the sunlight intensity. Compact well-branched plant and profuse bloomer for summer borders and the cutting garden. Fleuroselect Novelty 2018.

Cosmos bipinnatus
'Capriola' FSN

Cosmos bipinnatus
'Rubinato' FSN

Cosmos bipinnatus
'Cosimo Red-White' FSN

Cosmos bipinnatus
'Xanthos' FSN

Cosmos bipinnatus Large Flowered Varieties

These tall free-flowering Cosmos varieties are excellent cut flowers for home gardeners and farmers' markets. They will bloom in borders steadily for weeks from summer through early autumn. Sturdy plants and larger flowers compared to the dwarf varieties.

Type	Annual
Use	Landscaping and cut flowers
Height	60-80 cm / 25-32 in.
Flowering season	July - September, summer

Cosmos bipinnatus 'Apricotta' FSN

Our Cosmos Apricotta has already become a favourite among gardeners. The colour is exceptional: adorable shades of apricot with some pink and a lovely soft pink center. The tall plants make a wonderful display in high borders and the long stems are perfect for bouquets. With Apricotta we add yet a new dimension to our exceptional Cosmos range. Fleuroselect Novelty 2021.

Cosmos bipinnatus 'Rosetta' FSN

Cosmos type with large flowers, mostly single flowers but also flowers with a collarette: a second row of petals. Delicate colour of various shades of pink often with lighter pink and white stripes in the length of the petals. Fleuroselect Novelty 2016.

Cosmos bipinnatus 'Rubenza' FSN

Rubenza is a masterpiece of understated elegance. The flowers open dark ruby red and fade to old rose as flowers mature. This fashionable dark red colour is special for this Cosmos species as the usual Cosmos red is in fact purple red. Rubenza is a Cosmos with an exclusive and irresistible allure. Fleuroselect Novelty 2008.

Cosmos bipinnatus 'Velouette'

Exceptional Cosmos variety with a unique contrasting colour pattern. The large flowers have the same dark red colour as Rubenza, but the petals have clear white stripes, and some flowers are white with a dark red picotee. Eye-catching color effect when planted in large groups.

Cosmos bipinnatus
'Apricotta' FSN

Cosmos bipinnatus
'Rosetta' FSN

Cosmos bipinnatus
'Rubenza' FSN

Cosmos bipinnatus
'Velouette'

Cucumis 'Deco-Fruits'

Ornamental or deco-cucumbers in all kinds of shapes and colours. The fruits do not look like the usual edible cucumbers and are for ornamental use only. Fruits are used as, or in combination with, small pumpkins in decorations in autumn, fruit plates, flower arrangements etc. Culture is easy, grow on a warm, sheltered site as climber or trailing plant, the average plant spread is 120-180 cm / 47-70 in. Harvest the fruits late summer, early autumn for decoration only. See also Zehneria scabra.

Type	Annual
Use	Climber or trailing plants, decorative fruits
Height or spread	120-180 cm / 47-70 in.
Flowering season	June - September, summer

Cucumis 'Deco-Fruits Mix'

Striking mixture of all species with similar fruit size such as C. africanus, C. anguria, C. canoxii, C. carolinus, C. dipsaceus, C. melo Queen Anne's Pocket, C. myriocarpus and Zehneria scabra. Easy to grow in a home garden and will give a good harvest of all kinds of fruits in different shapes and colours.

Cucumis africanus

The elongated, slightly oval shaped fruits are about 6 cm / 2.5 in. long. Brown with contrasting light brown stripes and spikes. The fruits of this species are quite distinctive and therefore very useful in combination with other species.

Cucumis 'Deco-Fruits Mix'

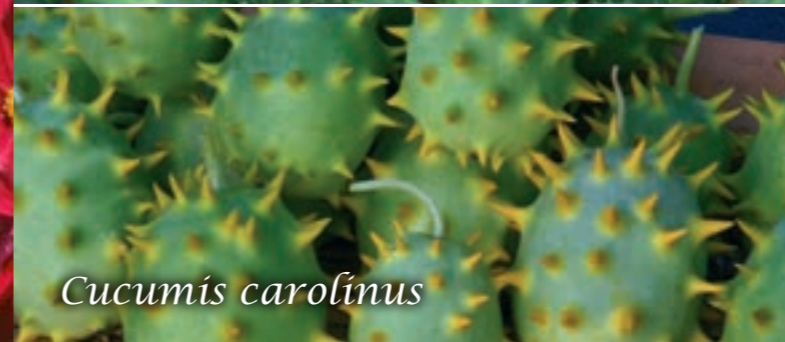

Cucumis anguria

Cucumis africanus

Cucumis canoxii

Cucumis carolinus

Cucumis anguria

Bur Gherkin, West Indian Gherkin. Easy species which produce a good quantity of decorative fruits. The fruits are round and are about 6 cm / 2.5 in. in size with long fleshy spines. The colour is light green. In spite of the name, it is not a gherkin.

Cucumis canoxii

Easy-to-grow species producing 5 cm / 2 in. round fruits. The eye-catching fruits are light green with lighter stripes and short spines.

Cucumis carolinus

Amazing fruits look like kiwano (C. metuliferus) but are much smaller and in northern areas C. carolinus is much easier to grow. It is an early species, late summer the first fruits can be picked. The plant is not a real climber but more a trailing type. Fruit size is 7 cm / 2.8 in. The light green fruits have spectacular large yellow spines.

Cucumis dipsaceus

Hedgehog Gourd, Teasel Gourd. The oval fruits resemble the spiny flower head of teasel as they are densely covered with soft fleshy spines. Fruit colour is light green and the size is about 6 cm / 2.4 in. long.

Cucumis dipsaceus

Cucumis melo 'Queen Anne's Pocket'

Pocket Melon, Fragrant Melon, Duft Melon, Melon de Poche. The fruits are very aromatic but not very sweet or tasteful. A long time ago ladies carried the small fruits in their pockets as a fragrance. Pick the small round and oval fruits when they are cream mottled green and let them mature inside. The green is turning to deep orange and the fruit have a delicate sweet fragrance. Shelf life is not very long. Best grown on a warm sheltered spot or in a glasshouse. Plant spread is 80-180 cm / 32-70 in.

Cucumis melo 'Queen Anne's Pocket'

Cucumis myriocarpus

This species will produce loads of 4 cm / 1.6 in. round fruits. The fruits are dark green with light green stripes and short spines. Shelf life is quite good. The fruits are said to be poisonous when eaten raw, in any case they are very bitter.

Cucumis myriocarpus

Cucumis sativus 'Sikkimensis'

Cucumis sativus 'Sikkimensis'

Sikkim Cucumber, Sikkim Gurke, Concombre de Sikkim. Ages old varieties of this sikkimensis type are grown as a food crop in mountainous India and Nepal. Fruits are 20 cm / 8 in. large, oblong somewhat oval in shape. Fruit flesh is edible but not very tasteful. Main characteristic is the unique netted fruit skin. When ripe the fruit skin looks like old dark brown crackled leather. Impressive and sure to raise questions. Shelf life of the fruits is not very long. Grow outside like other cucumbers for consumption.

Type Annual
Use Edible and decorative fruits
Spread 80-140 cm / 32-55 in.
Flowering season June - September, summer

Cucurbita moschata 'Futtsu Black Early'

Decorative and tasteful medium sized pumpkin. Average fruit weight is 1.5 kg / 3 lbs. Fruits are dark green, almost black, flat round, slightly wrinkled and ribbed. Later on the fruit turn grey-brown at maturity. Very good eating quality, nutty sweet flavour.

Type Annual
Use Edible and decorative fruits
Spread 80-140 cm / 32-55 in.
Flowering season June - September, summer

Cucurbita moschata 'Futtsu Black Early'

Cucurbita pepo 'Baby Boo'

Cucurbita pepo 'Baby Boo'

White mini-pumpkin of tennis ball size. One plant produces many flat shaped, slightly ribbed fruits. Remarkable creamy-white colour for floral decorations. Vigorous trailing plant for growing on trellis and fences. Fun to grow for children and adults.

Type Annual
Use Decorative fruits
Spread 80-140 cm / 32-55 in.
Flowering season June - September, summer

Dahlia variabilis 'Sunny Reggae' FSN

Beautiful collarette Dahlia in various shades of orange, scarlet and orange-yellowish bicolours. The large flowers have an unusual shape: each flower has a second row of smaller petals like a collar. Dahlias are easy to grow from seed and produce long flowering border plants and good cut flowers. Fleuroselect Novelty 2011.

Type Annual
Use Bedding plant, border plant, cut flower, containers
Height 50-60 cm / 20-25 in.
Flowering season July - October, summer - late summer

Dahlia variabilis 'Sunny Reggae' FSN

Dolichos lablab 'Silver Moon'

Dolichos lablab 'Silver Moon'

Lablab purpureus

Silver Moon is an annual vine that produces nice white flowers on long erect spikes. It is known as hyacinth bean or lablab bean and it is cultivated for food. The green pods and beans are toxic but can be eaten when boiled very well with multiple changes of the water. Silver Moon is however an excellent garden plant and fast growing ornamental climber for covering walls and trellis with green leaves above which the flower spikes emerge.

Type Annual
Use Climber
Height 200-250 cm / 40-45 in.
Flowering season July - September, summer

Emilia javanica 'Irish Poet'

Tassel Flower. Beautiful bright orange variety for naturalistic gardens. This annual has long stems and small fluffy light orange flowers in clusters. These flowers have once been described as the windswept hair of an Irish poet. Suitable as specialty cut flower, colourful filler for summer bouquets.

Type Annual
Use Bedding plant, border plant, landscaping
Height 40-60 cm / 16-25 in.
Flowering season June - September, summer

Emilia javanica 'Irish Poet'

Eschscholzia californica 'Yukon Gold'

Eschscholzia californica 'Yukon Gold'

California poppy in an eye-catching two-tone, bright orange-golden bicolor. The petals have bright goldenyellow tips and an orange-yellow centre. The slightly ruffled blooms sit above attractive fine blue-green feathery foliage. Eschscholzia is an easy to grow annual for direct sowing. Yukon Gold is spectacular when sown in drifts in sunny borders, but you can also use it to fill gaps in the border and in mixed plantings with other annuals.

Type Annual
Use Border plant, landscaping
Height 25-30 cm / 10-12 in.
Flowering season June - September, summer

Helianthus debilis 'Soluna Lemon' FSN

New colour in Helianthus debilis. Soluna Lemon is a small sunflower with short stems and therefore very suitable for smaller bouquets. The broad petals around the dark centre form beautiful round flowers in wonderful soft yellow. The smaller flowers size, about 8 cm / 3 in. fit very well in mixed bouquets. The plants grow about 120 cm / 45 in. tall and are very well branched and flower freely all summer long. Excellent variety for the back of the garden. Fleuroselect Novelty 2019.

Type Annual
Use Cut flower, landscaping
Height 100-120 cm / 40-45 in.
Flowering season July - September, summer
Seed count 180 seeds per gram

Helianthus debilis 'Soluna Lemon' FSN

Ipomoea purpurea

Morning Glory, Pharbitis, Trichterwinde, Ipomée volubilis

Ipomoea purpurea is a very attractive and easy-to-grow climber with an impressive garden performance throughout the season. It is an early flowering species which can also be grown as a pot plant. We offer several varieties and mixtures of this well-known climber. Some of them are real must-haves for many gardeners in world.

Type Annual
Use Climber
Height 160-180 cm / 65-70 in.
Flowering season July - October, summer - late summer

Ipomoea purpurea 'Carnevale di Venezia'

This spectacular mixture is as colourful as the Venice Carnival. This easy-to-grow climber has extraordinary flowers, all striped white and blue or white and pink and some other bicolours. Vigorous climber for trellis and fences. Grown from special selected stock in order to maintain a well-balanced mixture of striped flowers featuring different colours.

Ipomoea purpurea 'Venice Blue' FSN

Beautiful striped flowers in blue and white. Fleuroselect novelty 2009.

Ipomoea purpurea 'Venice Pink' FSN

The incredible bicolor flowers in pink and white. Fleuroselect novelty 2009

Ipomoea purpurea 'Dacapo Light Blue'

Eye-catching heavenly blue flowers with a darker purple-blue star. Outstanding colour in Ipomoea purpurea.

Ipomoea purpurea 'Carnevale di Venezia'

Ipomoea purpurea 'Venice Blue' FSN

Ipomoea purpurea 'Venice Pink' FSN

Ipomoea purpurea 'Dacapo Light Blue'

Ipomoea purpurea 'Mixtures'

Stunning designer mixtures of *Ipomoea purpurea*. Each of these eye-catching colour-themed mixtures is a formula mixture of separate colours. All colours have been selected by us and we improved the plant habit and florescence. The mixtures create each morning a dazzling display of delicate flowers in well balanced shades. Check our website for more mixtures.

Ipomoea purpurea 'Bohemian Shades'

Mixture of dark violet and dark red shades.

Ipomoea purpurea
'Bohemian Shades'

Ipomoea purpurea 'Lazy Luxe'

Luxurious formula mixture of 10 sparkling colours. Lazy Luxe displays each morning many different colours from clear white to violet and rosy-red.

Ipomoea purpurea
'Lazy Luxe'

Lathyrus tingitanus 'Roseus'

Sophisticated flowers in a graceful coral pink. Just as easy to grow as *L. odoratus* but *L. tingitanus* 'Roseus' has no fragrance. Lovely cut flower for small bouquets.

Type Annual
Use Climber, cut flower
Height 140-160 cm / 55-63 in.
Flowering season July - October, summer - late summer

Leonurus sibiricus

Tall and naturalistic annual with pinkish flowers in whorls on long stalks. The plant easily grows to 1.80 meters / 70 in. tall. Suitable as cut flower.

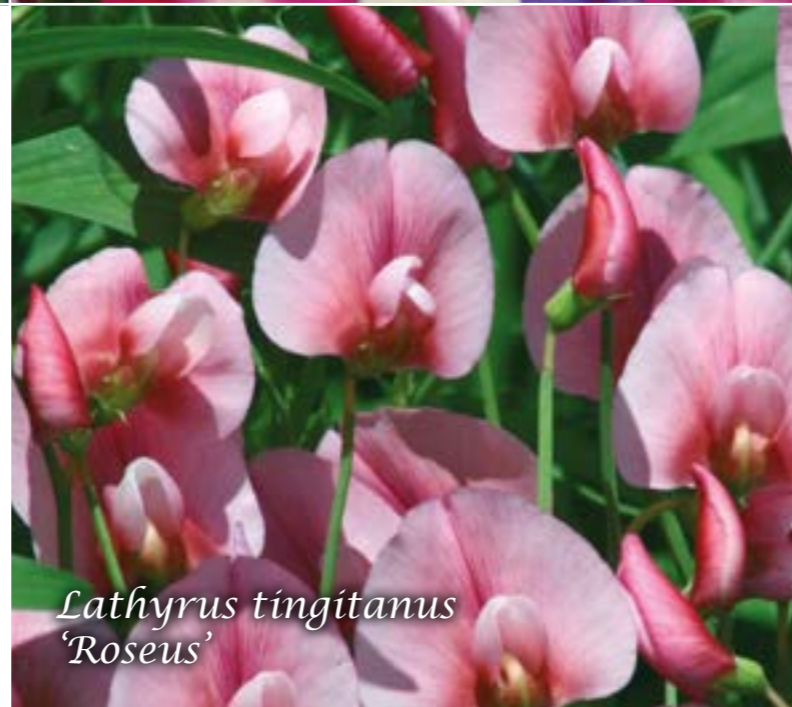

Leonurus sibiricus 'Alba'

Exceptional tall accent plant with clear white flowers that brighten up and add stature to borders.

Type Annual
Use Border plant, cut flower, landscaping
Height 150-180 cm / 60-70 in.
Flowering season June - September, summer

Leonurus sibiricus
'Alba'

Lathyrus tingitanus
'Roseus'

Leonurus sibiricus

Linaria maroccana 'Licilia'

Baby Snapdragon, Leinkraut, Linaire du Maroc

Linaria is a quick growing annual which will bloom within 6 weeks from a direct sowing in early spring. *Linaria* is an elegant filler in herbaceous borders for a quick display of summer colours. They intermingle attractively with neighbouring plants and create clouds of charming little snapdragon-like flowers. The long stems are also excellent cut flowers with a good vase life.

Type Annual
Use Border plant, landscaping, cut flower
Height 50-60 cm / 20-25 in.
Flowering season June - August, summer

Linaria maroccana 'Licilia Azure' FSN

Sparkling fresh light blue - white flowers. Fleuroselect novelty 2008.

Linaria maroccana 'Licilia Peach' FSN

Charming peachy tones, orange with rosy red. Fleuroselect novelty 2008.

Linaria maroccana 'Licilia Red'

Dark red mini snapdragon.

Linaria maroccana 'Licilia Violet'

Deep violet blue with a bright yellow throat.

Lupinus hartwegii 'Avalune'

Avalune is a series of compact plants in a nice range of colours. Suitable for pot sizes 10-12 cm / 4-5 in. and they can be grown in cool conditions. Avalune will bloom in early spring within 12 weeks from sowing with well-packed flower spikes. Great for bedding and mass plantings. These sweetly scented lupines add excitement to your garden. Available in three solid colours: Blue, Pink and White, two bicolours and various mixtures, see our website.

Type	Annual
Use	Bedding plant, border plant
Height	40-50 cm / 15-20 in.
Flowering season	June - September, summer

Lupinus hartwegii 'Avalune Blue'

Lupinus hartwegii 'Avalune Lilac-White' FSN

Striking bicolor lilac and white flowers. Fleuroselect Novelty 2013.

Malcolmia maritima 'Spring Sparkle' Virginia Stock, Meerlevkoje, Julienne de Mahon

Spring Sparkle starts rose and fades to lilac blue. Malcolmia is for some reason an underestimated little annual, but this should change as it is very easy to grow with an excellent performance. Direct sowing on dry soil and even in gravel gives beautiful results in early spring. This new selection provide flower beds with lovely rose to lilac blue shades with a delicate sweet fragrance.

Type	Hardy annual
Use	Bedding plant, border plant, landscaping
Height	10-20 cm / 4-8 in.
Flowering season	March - June, spring and summer

Malcolmia maritima
'Spring Sparkle'

Madia elegans

Madia elegans

Common Tarweed. Deliciously fragrant annual. The intoxicating fragrance, resembling a tropical fruit cocktail, delights everyone coming close to it on a warm summer evening or early summer morning. Night flowering plants use fragrance to attract insects at night. Flowers are yellow with a maroon ring round the centre.

Type	Annual
Use	Border plant, landscaping
Height	60-80 cm / 25-32 in.
Flowering season	June - September, summer

Mirabilis jalapa 'Marbles'

Four O'Clock, Wunderblume, Belle de Nuit

In our Marbles series we offer three different varieties, all with striped, bicoloured flowers. Available as separate colours or as a mixture. The fragrant flowers open late afternoon and continue flowering till the next morning, even longer on cloudy days. The setting in the garden is crucial for enjoying the perfume in your evening chair. Ideal for high borders and when given space they develop an attractive rounded plant with many flowers on top of it.

Type	Annual, tender perennial
Use	Border plant, landscaping
Height	60-90 cm / 25-36 in.
Flowering season	June - September, summer

Mirabilis jalapa
'Marbles Mix'

Mirabilis jalapa
'Marbles White-Red' FSN

Mirabilis jalapa 'Marbles White-Red' FSN

Flowers in most contrasting colour combination white and red. Eye-catching in the evening. Fleuroselect novelty 2008.

Mirabilis jalapa 'Marbles Yellow-Red'

Orange yellow and red marbled flowers which seem orange from a distance.

Mirabilis jalapa 'Marbles Mix'

Spectacular formula mixture of three Marbles colours; all striped and bicolour flowers.

Mirabilis jalapa 'Marbles White-Yellow'

Pure white and soft yellow in each flower which create a beautiful luminosity in the evening.

Mirabilis jalapa
'Marbles White-Yellow'

Mirabilis jalapa
'Marbles Yellow-Red'

Mirabilis jalapa 'Salmon Sunset'

Four O'Clock in shades of pinkish orange; a very special colour. This strong and vigorous plant creates a real presence in the garden when the flowers open in the late afternoon. The flowers release an exotic scent in the evening till the next morning.

Type	Annual, tender perennial
Use	Border plant, landscaping
Height	60-90 cm / 25-36 in.
Flowering season	June - September, summer

Mirabilis jalapa
'Salmon Sunset'

Mirabilis longiflora 'Angel Trumpets'

Mirabilis longiflora is an exceptional plant with very special flowers with an exotic appearance. The tubular flowers look like *Nicotiana sylvestris* but are larger; about 20 cm long and they open in the late afternoon. The fragrant flowers are white with a purple red eye. Spreading plant habit. It will flower easily in the first year from sowing and the tubers can survive mild frost in winter.

Type	First-year-flowering tender perennial
Use	Border plant, landscaping
Height	60-80 cm / 25-32 in.
Flowering season	June - September, summer

Mirabilis longiflora
'Angel Trumpets'

Nepeta nervosa
'Nevita White' FSN

Nepeta subsessilis
'Grand View'

Nepeta nervosa 'Nevita White' FSN

New white flowering *Nepeta nervosa* variety. Nevita White will flower in the first year from a spring sowing and can be grown as an annual container and bedding plant. Nevita White is a good ground cover. Like all *Nepeta* it will attract bees and other beneficial insects to the garden. Fleuroselect Novelty 2019.

Type	First-year-flowering perennial
Use	Border plant, landscaping
Height	25-30 cm / 10-12 in.
Flowering season	June - October, summer

Nepeta subsessilis 'Grand View'

Large flowered catmint in various colours. Beautiful and impressive for borders. It is a strong and hardy perennial which flowers easily in the first year of sowing. No special conditions required, normal soil and moist levels, full sun or partly shade.

Type	First-year-flowering perennial
Use	Border plant, landscaping
Height	40-60 cm / 15-25 in.
Flowering season	June - September, summer

Nepeta subsessilis 'Panther'

Catmint, Katzenminze, Menthe des chats

The varieties of this beautiful and aromatic perennial catmint fit very well in annual production schedules. Compact and well-branched plants feature dense flower spikes with large flowers. *Nepeta subsessilis* has the largest flowers of all *Nepeta*. Easy to grow in cool conditions and excellent choice for small pots and large containers. They will start to flower 15 weeks after sowing. The flowers attract many bees and butterflies.

Type	First-year-flowering perennial
Use	Border plant, landscaping, containers
Height	30-50 cm / 12-20 in.
Flowering season	June - September, summer

Nepeta subsessilis 'Blue Panther' FSN

Very well-branched plants with clear blue flowers. Fleuroselect Novelty 2014.

Nepeta subsessilis 'Dark Blue Panther'

Strong plant with dark blue flowers.

Nepeta subsessilis 'Pink Panther'

Elegant variety with clear pink flowers.

Nepeta subsessilis 'Snow Panther' FSN

Snow Panther is the first white *Nepeta subsessilis* and completes the Panther series. Fleuroselect Novelty 2021

Nepeta subsessilis
'Blue Panther' FSN

Nepeta subsessilis
'Dark Blue Panther'

Nepeta subsessilis
'Snow Panther' FSN

Nepeta subsessilis
'Pink Panther'

Nicotiana

Flowering Tobacco, Ziertabak, Tabac d'ornement

Nicotiana has wonderful species for the garden. Many are high growing annuals with fragrant white or green flowers. The high growing species are beautiful accent plants in the back of the border, or can be used as height divider in mix borders with other annuals. All *Nicotiana* are poisonous.

Type	Annual
Use	Border plant, landscaping
Height	70-90 cm / 28-35 in.
Flowering season	June - September, summer

Nicotiana alata 'Grandiflora'

Very showy and very fragrant *Nicotiana*. The 10 cm / 4 in. long, cream-white, tubular flowers open in the evening and spread a delightful scent. Plant or sow them close to your evening reading chair or walkway to enjoy the fragrance during the summer evenings.

Nicotiana hybrida 'Starlight Dancer' FSN

Starlight Dancer is a hybrid with long stems and small white bellshaped flowers. It looks like a white-flowered *Nicotiana langsdorffii*. Fantastic variety as high eye-catcher in mixed borders and large containers. Wonderful fragrance in the evening. Fleuroselect Novelty 2017

Nicotiana langsdorffii

Well known *Nicotiana* for its unusual flowers. Airy plant with upright stems with chartreuse green flowers as small nodding bells. Beautiful and interesting addition to mixed borders as it cannot be compared to any other plant.

Nicotiana alata
'Grandiflora'

Nicotiana hybrida
'Starlight Dancer' FSN

Nicotiana langsdorffii

Oxalis valdiviensis

Oxalis valdiviensis

One of the few annual Oxalis species. Quite easy to grow. It quickly forms nice green plant with clover like leaves. The golden yellow flowers keep on popping up during the summer from the base. Suitable for flower beds and large pots in full sun or partial shade.

Type Annual
Use Bedding plant, border plant, pot plant
Height 20-30 cm / 8-12 in.
Flowering season June - September, summer

Nigella bucharica
'Blue Stars'

Nigella bucharica 'Blue Stars'

Nigella with wiry stems, feathery leaves and small blue flowers in the shape of five pointed stars. Border filler as it grows easily from a direct sowing and flowers quickly and all summer long.

Type Annual
Use Bedding, border plant
Height 30-50 cm / 12-20 in.
Flowering season July - September, summer

Papaver rhoeas

Corn Poppy, Field Poppy, Klatsch-Mohn, Coquelicot

Poppies are easy direct-sow hardy annuals ideal for adding colour to borders in early spring. Papaver rhoeas can be sown in autumn as the seedlings will overwinter and flower early in the next spring. It is a plant that grows in all conditions. Traditional favourite for cottage and natural gardens with delicate flowers.

Type Annual
Use Border plant, landscaping
Height 40-60 cm / 15-25 in.
Flowering season June - September, summer

Papaver rhoeas 'Amazing Grey' FSN

With this new variety you will get poppies in various shades of grey in your garden: from silver grey to slate blue, sometimes with a red blush, and some flowers have a white edge. The single and ruffled half-double poppies create impressive grey clouds in the border, but every of these clouds has a silver lining. Fleuroselect Novelty 2018.

Papaver rhoeas
'Amazing Grey' FSN

Papaver rhoeas
'Pandora'

Papaver rhoeas 'American Legion'

Heirloom variety with large flowers. Bright red poppy with a clear white cross in the centre of the flower.

Papaver rhoeas 'Bridal Silk' FSN

Did you ever see a field of white Poppies? Now it is possible. Bridal Silk is something completely different from the usual red corn poppy or the mixtures. Delicate pure white flowers with creamy yellow anthers give a stunning view when sown in drifts. Fleuroselect novelty 2008.

Papaver rhoeas 'Mother of Pearl'

Poppies in a lovely mixture of misty and subtle shades. The late Sir Cedric Morris, painter and gardener, selected and presumably named years ago this mixture of pale and smoky colours as grey, lilac, mauve, pink, soft orange and white. And various flowers with flecking in the same tones and some delightful picotees. It is one of the most subtle poppy mixtures to grow in your garden.

Papaver rhoeas 'National Mix'

Cheerful mixture of bright red and white poppies. A beautiful combination for sowing in large borders and landscapes, for a poppy-field in your favourite or national colours.

Papaver rhoeas 'Pandora'

Unique and truly impressive poppy. Pandora blooms in a phenomenal and surprising combination of shades, from the deepest burgundy red to pinkish-red all with silver-grey stripes on the lower petals. During the flowering season the colours change gradually.

Papaver rhoeas
'American Legion'

Papaver rhoeas
'Bridal Silk' FSN

Papaver rhoeas
'Mother of Pearl'

Papaver rhoeas
'National Mix'

Papaver somniferum

The large flowered *Papaver somniferum* is an easy to grow annual and because of its taproot only for direct sowing. Just scatter the seeds in autumn or early spring, through borders and along edges and wait for the impressive flowers.

Type	Annual
Use	Border plant, landscaping
Height	70-90 cm / 28-35 in.
Flowering season	June - September, summer

Papaver somniferum
'Black Swan'

Papaver somniferum
'Lilac Pompom'

Papaver somniferum
'Hungarian Blue'

Papaver somniferum 'Lilac Pompom'
Amazing laciniatum type in delicate lilac. Eye-catching: large frilly double flowers in a captivating new colour above blue-grey foliage.

Penstemon barbatus
'Twizzle Scarlet' FSN

Papaver somniferum 'Black Swan'

Laciniatum type: the flowers are double to semi-double and frilled with numerous finely cut petals in shining black or better dark burgundy red.

Papaver somniferum 'Hungarian Blue'

Heirloom bread-seed poppy variety with single flowers in purple-blue shades and dark markings on each petal. The grey-blue seeds are used for baking.

Penstemon barbatus 'Twizzle'

Twizzle is a first-year-flowering *Penstemon* series consisting of five colours. All have a natural and elegant plant habit and an excellent garden performance. The plants have strong upright stems and long airy spikes with tubular flowers. Twizzle adds height and elegance to annual and perennial borders and can be used in various creative landscaping combinations. This *Penstemon* series is pollinator friendly: it attracts many kinds of bees and hummingbirds. Well-established plants in the garden are fairly drought tolerant and winter hardy.

Growers can grow Twizzle as a cool crop and also outside, for a long sales season. When started from an autumn sowing the plants will flower in spring and early summer; the plants will bloom from a spring sowing in summer and late summer without vernalisation. Twizzle can be marketed as a premium plant in 12-18 cm / 4-7 in. containers.

Type	First year flowering perennial
Use	Border plant, landscaping
Height	70-90 cm / 28-35 in.
Flowering season	June - September, summer

Penstemon barbatus 'Twizzle Blue' FSN

Outstanding intense blue flowers for an impressive display. Some flowers are slightly tinged with violet. Fleuroselect Novelty 2020.

Penstemon barbatus 'Twizzle Coral' FSN

Elegant spikes of delicate coral pink flowers. Fleuroselect Novelty 2017.

Penstemon barbatus 'Twizzle Purple' FSN

Graceful flowers in a pretty purple colour. AAS Regional Winner 2017: Heartland and Southeast. Fleuroselect Novelty 2017.

Penstemon barbatus 'Twizzle Scarlet' FSN

Twizzle Scarlet produces strong stems and spikes with tubular flowers in a vivid scarlet colour. Fleuroselect Gold Medal winner 2017.

Penstemon barbatus 'Twizzle White' FSN

Stately plants with creamy white flowers for contrast in the border. Fleuroselect Novelty 2020.

Phlox drummondii

These grandiflora Phloxes are fabulous all season when sown or planted in drifts in the border. Stunning and fragrant cut flower with very good vase life.

Type Annual
Use Border plant, landscaping
Height 40-50 cm / 15-20 in.
Flowering season June - October, summer

Phlox drummondii 'Blushing Bride'

The flowers change colour when open which results in a lovely shade mixture of blush-white and fresh light red.

Phlox drummondii 'Cherry Caramel' FSN

Large flowered variety with a special colour combination in one flower. The flowers are caramel, brown-yellow with a cherry red centre. These contrasting colours make it an impressive variety. Fleuroselect novelty 2009.

Phlox drummondii 'Sugar Stars' FSN

Grandiflora Phlox with star shaped flowers in a striking colour pattern: blue with white stripes in the centre. Fleuroselect Novelty 2011.

Persicaria orientalis
'Cerise Pearls'

Phacelia grandiflora
'Summertime Blues'

Persicaria orientalis 'Cerise Pearls' Kiss-me-over-the-garden-gate, Smartweed, Östlicher Knöterich

Cerise Pearls is a shorter variety of this extraordinary tall annual. The plant has large heart-shaped leaves which create an exotic and impressive sight. The top of the branches curve down with a load of flower spikes of many rosy red blooms. Best when direct seeded in the garden, as germination is challenging

Type Annual
Use Border plant, landscaping
Height 80-140 cm / 30-55 in.
Flowering season July - October, summer - late summer

Phacelia grandiflora 'Summertime Blues'

Easy-to-grow annual in a beautiful mixture of various blue shades and white. Flowers all summer long with bell-shaped flowers which will be frequently visited by bees and butterflies. Best when direct sown in sunny borders on well drained soils.

Type Annual
Use Border plant, landscaping
Height 40-60 cm / 15-25 in.
Flowering season June - September, summer

Salpiglossis sinuata 'Black Trumpets'

Large trumpet-shaped flowers in black, sometimes slightly veined with gold. Growing Salpiglossis needs some attention but you will be rewarded with blooms in a spectacular colour when grown in a warm and sheltered position in the garden or as pot plant.

Type Annual
Use Bedding, border plant
Height 40-50 cm / 15-20 in.
Flowering season July - September, summer

Salpiglossis sinuata
'Black Trumpets'

Silene pendula 'Sibella' FSN

Type Biennial, hardy annual
Use Border plant, landscaping, containers, baskets
Height 30-40 cm / 12-15 in. Spread : 60 cm / 23 in.
Flowering season May - September, summer

Sibella is a truly innovative series of *Silene pendula* with a completely new plant habit. It is an excellent plant for bedding, early spring baskets and patio containers. The plants are hardy and can overwinter in a cold glasshouse for early flowering plants in spring. It can be grown as a cold crop along with pansies and spring flowering perennials. Sibella can be planted outside in early spring and the spreading plants make a colourful carpet of tiny flowers early in the season. Sibella is also suitable for growing in hanging baskets, and as it blooms early, it will fill the first flowering baskets of the season. In short: new and different series for early spring!

When started from a spring sowing Sibella can be used for bedding and baskets both for sunny and shady spots in the garden. With small trials you can find out the versatility of this new series and the opportunities it offers in the marketplace. There are four colours available: Carmine, Lilac, Pink and White. All varieties are Fleuroselect Novelties. Sibella Carmine is a Fleuroselect Gold Medal Winner for 2020.

Silene 'Sibella Carmine' FSN

Silene 'Sibella Lilac' FSN

Silene 'Sibella Pink' FSN

Silene 'Sibella White' FSN

Silene 'Sibella Mix' FSN

Solanum 'Deco-Fruits'

These *Solanum* species and varieties are grown for ornamental fruits. Some are edible but small compared to the usual purple eggplant. They need a warm climate or glasshouse for best results but can also be grown outside on a sheltered place.

Type Annual
Use Decorative fruits
Flowering season June - September, summer.
 Harvest, late summer

Solanum species 'Deco-Fruits Mix'

Solanum aethiopicum

Solanum melongena 'Striped Toga'

Solanum aethiopicum

Solanum aethiopicum produces many ribbed fruits which look like tiny orange-red pumpkins. Also known as as pumpkin-on-a-stick. The average fruit size is about 6 cm / 2.5 in. and the shelf life is good. Great in autumn decorations with deco-cucumbers and small pumpkins. Height 80-100 cm / 30-40 in.

Solanum melongena 'Striped Toga'

Eggplant heirloom variety. The oval shaped fruits grow in small clusters together; fruit size is 6 cm / 2.5 in. The fruit start green with darker green stripes later turning yellow and beautiful glossy orange with green stripes. Highly decorative for flower arrangements and fruit plates. The small fruits are edible. Height 140-180 cm / 55-70 in.

Solanum species 'Deco-Fruits Mix'

Beautiful mixture of ornamental *Solanum* or eggplants. In this colourful mixture you will find *Solanum aethiopicum*, *Solanum melongena* Striped Toga and *Solanum melongena* Thai Yellow. Height 80-180 cm / 30-70 in.

Solanum melongena 'Thai Yellow'

Eggplant heirloom variety. The small, oval shaped fruits start white and turn yellow at maturity. The fruit size is 8 cm / 3 in. Height: 80-100 cm / 30-40 in.

Tropaeolum majus

Nasturtium, Kapuzinerkresse, Capucine

Type	Annual
Use	Bedding, containers and hanging baskets
Height	Semi-trailing plant, spread 80-120 cm / 30-50 in.
Flowering season	July - October, summer - autumn

Tropaeolum majus 'Cherrelle'

Cherrelle delivers large double blooms in red-rose shades well above the solid green foliage. The superior flowers have the delightful colour of freshly made cherry juice on a warm summer evening. The semitrailing plants wind themselves through the border and cascade beautifully over edges and from baskets.

Tropaeolum majus 'Troika'

Tropaeolum Troika series has five colours and a mixture. All colours have large single blooms and are top-flowering over variegated foliage all summer. Semi-trailing plants create a good ground cover and tumble freely from containers and baskets.

Tropaeolum majus 'Cream Troika' FSN

Large showy single blooms in a remarkable colour combination, cream with distinctive maroon markings. Fleuroselect Novelty 2011.

Tropaeolum majus 'Orange Troika' FSN

Nasturtium variety with vibrant tangerine orange flowers all summer. Impressive in combination with the variegated leaves. Fleuroselect Novelty 2011.

Tropaeolum majus 'Red Troika'

Dark red flowers stand out clearly over the cream marbled leaves.

Tropaeolum majus 'Velvet Troika'

Deep maroon colour, excellent in combination with 'Cream Troika'

Tropaeolum majus 'Yellow Troika'

Vivid yellow with clear red markings in the centre of the flower.

Tropaeolum majus 'Troika Mix'

Nasturtium mixture of the five separate colours: cream, orange, maroon, red and yellow, all complemented by rich variegated leaves.

Ursinia anethoides 'Valencia'

Profusely blooming pot plant with showy single flowers in brilliant orange. Valencia has a beautiful mounding habit, is self-branching and will fill containers quickly. It creates a wonderful elegant flower canopy. Excellent patio-plant for mixed containers, baskets and for the front of the borders. Suitable for production in pot sizes 10-12 cm (4-5 in) for spring sales

Type	Annual
Use	Bedding plant, borders and containers
Height	20-25 cm / 8-10 in.
Flowering season	May - September, spring - summer

Verbena bonariensis 'Vanity' (VERBDF) FSN 

Type first year flowering perennial
Use border plant, landscaping, containers
Height up to 80 cm / 31 in
Flowering season June - October, summer - autumn

Verbena bonariensis
 'Vanity'

'Vanity' is the first *Verbena bonariensis* from seed that is both compact and fragrant. 'Vanity' produces short sturdy plants with excellent basal branching; shorter than the standard Vervain that we all know. This adds new possibilities: where the standard Vervain is only suitable in landscaping and wild flower mixtures, 'Vanity' can be grown in containers and in borders, also for the smaller gardens. Fragrant in the evenings and early mornings over a long flowering season. On top of that, the flower colour is of a more intense purple-blue than the standard Vervain. 'Vanity' is a perennial (hardy to USDA zones 7-11), but can be grown as an annual and will flower in the first year. 'Vanity' is pollinator-friendly and attracts beneficial insects. Grow in well-drained soil, tolerates full sun to partial shade, keep the soil moist. AAS and Fleuroselect Gold Medal Winner 2023.

Protection information: FSN-2022, PVR EU 56637 (VERBDF), US PP33,791 (VERBDF)

Zehneria scabra

The old name is *Melothria scabra*. Ornamental cucumber species with tiny, distinctively light and dark green marbled fruits. The fruits are edible. It is a climber and when grown on a wire mesh, it will make a dense curtain of dark green leaves. The tiny flowers and fruits are not visible under the leaves.

Type Annual
Use Climber, edible and decorative fruits
Height 100-120 cm / 40-50 in.
Flowering season June - September, summer

Zinnia haageana 'Soleado' FSN

Beautiful Zinnia producing a mass of cheery single blooms in 3 colours the petals are light orange with golden-yellow edges and a mahogany ring around the centre. The strong plants are weather resistant and flower over a long period till the first frost in late autumn. Fleuroselect Novelty 2009.

Type Annual
Use Bedding, border plant, cut flower
Height 40-50 cm / 15-20 in.
Flowering season July - September, summer

Zehneria scabra

Verbena bonariensis
 'Vanity'

Zinnia haageana
 'Soleado' FSN

Zinnia elegans

Zinnia are fashionable flowers appreciated by many home gardeners around the globe. These varieties are peak performers in any garden, from a small urban garden plot to large landscapes, excellent for pick-your-own bouquets.

Type	Annual
Use	Bedding, border plant, cut flower
Height	25-30 cm / 10-12 in.
Flowering season	July - September, summer

Zinnia elegans 'Macarenia' FSN

Outstanding showiness. Mostly double scarlet flowers with golden tips. Flower size: 8 cm / 3 in. across. Strong plant habit with good branching. Fleuroselect Novelty 2012.

Zinnia elegans 'Mazurkia' FSN

Striking colour. Double and semi double scarlet flowers tipped with cream. Flower size: 8 cm / 3 in. across. Fleuroselect Novelty 2012.

Zinnia elegans 'Salsiando'

Superb mixture of both Macarenia and Mazurkia. Exceptional quality in bicour Zinnias.

General terms and conditions of sale and delivery

Article 1 Definitions

1. The 'Seller' refers to Van Hemert & Co. BV.
2. 'Buyer' refers to: the natural or legal person with whom the seller enters into any agreement regarding the products indicated in part 3.
3. 'Product (s)' refers to: seeds, cultivation material and/or ornamental and horticultural plants as well as horticulture products in the broadest sense.

Article 2 Applicability

1. These General Terms apply to all offers, sales and deliveries made by the seller and agreements concluded by the seller regarding the products as described in article 1 part 3 of these General Terms.
2. Any terms of the buyer, of any type and by any name are not applicable, unless expressly agreed in writing.
3. Any divergent provisions must be agreed expressly and in writing.
4. A copy of these General Terms will be provided to the buyer by the seller.

Article 3 Prices, offers and agreements

1. All offers are non-binding unless otherwise agreed in writing. An offer will remain valid for a maximum of 30 days.
2. The agreement is considered to have been concluded by written confirmation of the offer by the buyer, unless the seller objects in writing within five days after the buyer has sent a confirmation.
3. Prices are exclusive of VAT and additional expenses, including: transport charges, packaging costs, cost of quality control and/or phytosanitary inspection, import duties and government levies. If no price is agreed on, the seller's price in effect at the time of delivery will apply.
4. The seller is entitled to adjust the price, in accordance with the requirements of reasonableness and fairness, to a level to be determined by the seller, if his expenses have increased significantly since the price was set.
5. Prices are in euros (€) unless otherwise indicated.
6. If the buyer cancels the agreement, he will immediately owe 25% of the gross sale value of the to be delivered products as a cancellation charge.

Article 4 Conditions of sale

1. Complete or partial failure of the cultivation or harvest of products or partial spoilage during storage or processing for any reason will release the seller from the obligation to deliver and his other obligations, unless attributable to an intentional act or gross negligence on the part of the seller.
2. If the delivery of a variety that has been ordered is not possible for any reason, the seller is entitled to deliver another variety, or to cancel the order. The seller shall, in consultation with the buyer, make an effort to deliver a variety that is equivalent as much as possible. If the buyer does not accept another variety, the buyer has the right to cancel the order of this variety. If delivery of another variety has been agreed, the buyer does not have the right to receive compensation for damages or to terminate the agreement.

Article 5 Delivery, transport and packaging

1. Delivery is EXW (ex-warehouse) in accordance with the prevailing Incoterms, unless otherwise agreed. On delivery, the risk connected to the products in question, with all that is connected there to, is transferred to the buyer.
2. After consultation with the buyer, the seller will determine the delivery date. Delivery dates indicated are not considered deadlines. If a delivery date is agreed on, the seller will endeavor to maintain that date for delivery in as far as possible. If the seller cannot deliver on the agreed date, the seller will inform the buyer about this in the timeliest manner possible. Parties will determine a new delivery date.
3. Any extra costs due to taking earlier or later delivery of the products will be charged to the buyer.
4. If after a certain storage period that may be considered reasonable in view of the type of product, the buyer has not received the product and the risk of loss of quality and /or spoilage of the products leaves no other option, the order will be deemed to have been cancelled by the buyer. In that case, the buyer is obliged to pay the damage incurred by the seller as a result.
5. All products are packaged in the original packaging of the seller. Single-use packaging can be charged and will not be taken back.
6. The buyer may not use or allow third parties to use the packaging.

Article 6 Payment

1. The seller is entitled to request an advance of 50% or 100% on the invoice amount from the buyer.
2. Payment must occur within thirty days after the invoice date, unless otherwise agreed.
3. The buyer is not entitled to reduce the purchase price by any counter-claim he may make.
4. The buyer is not entitled to suspend the fulfilment of his payment obligation in the event of a complaint submitted by him to the seller regarding the products delivered.
5. All payments will be made at the offices of the seller or transfer into a bank account to be indicated by the seller.
6. Payment must be made in Euros or the currency indicated on the invoice.
7. If the buyer does not fulfil his payment obligation, mentioned in part 2 of this article, in time, he will be deemed to be in default by operation of law. The seller will then be entitled to charge interest at 1% monthly as from the date that the buyer is in default of fulfilling the payment obligation indicated in part 2, with a partial month being counted as a whole month.
8. If the buyer is in default or otherwise falls short in fulfilling any of his obligations, all reasonable costs to obtain satisfaction, both legal and extra-legal, will be at his expense.
9. The seller reserves the right to not carry out, or no longer carry out, orders or agreements if previous deliveries have not been paid for by the buyer or the buyer has not fulfilled or is at risk of not fulfilling his obligations to the seller. The buyer is required to pay the damage suffered by the seller due to this. The seller is not responsible for any damage to the buyer as a result of not carrying out orders.
10. The buyer located in a different EU Member State than the Netherlands will inform the seller in writing of his correct VAT identification number. Furthermore, the buyer shall provide all necessary information and documents that the seller requires as proof that the products have been delivered in a different EU Member State than the Netherlands.

Article 7 Force majeure and unforeseen circumstances

1. Force majeure refers to all unforeseen circumstance outside the direct sphere of influence of the seller, as a result of which fulfilment of the agreement can

Zinnia elegans
'Zinderella Red'

Zinnia elegans
'Zinderella Sunset'

no longer reasonably be expected. This may include strikes, fire, extreme weather conditions or government measures and diseases and plagues on the one hand or faults in the materials supplied to the seller on the other hand.

2. If the seller cannot fulfil its obligations because of force majeure, the seller must inform the buyer of the circumstances in writing as soon as possible. In the event of force majeure, the parties will agree a change to the agreement or complete or partial dissolution of the agreement.

Article 8 Guarantees and complaints

1. The seller guarantees that the products that are to be delivered on the basis of the order will comply with the requirements set out in the applicable regulations of Dutch testing authorities in effect at the time of concluding the agreement.

2. The seller does not guarantee the trueness to variety of the products that are generally known to branch back.

3. The seller does not guarantee the growth and blossoming of the products delivered.

4. The seller's seed varieties are for home garden use only and are not suited for productions of plants by professional growers, unless expressly agreed in writing.

5. Complaints regarding visible defects, including those regarding the quantity, size or weight of the products delivered, must be indicated to the seller within two days after delivery and the seller must be informed in writing within eight days.

6. Complaints regarding non-visible defects must be indicated to the seller immediately after detection and the seller must be informed in writing within eight days.

7. Complaints must also be indicated to the seller at such a time that the seller can check the product.

8. A complaint must at least include a detailed and accurate description of the defect.

9. Complaints regarding a portion of the products delivered cannot give rise to rejection by the buyer of the entire delivery.

10. The buyer is obliged to check the delivered quantity of the shipment delivered, or have this checked, on receipt and to report a deviation of the quantity to the seller.

11. Expressing a complaint does not suspend the buyer's obligation to pay, regardless of any justification of a complaint.

Article 9 Liability

1. The seller accepts no liability whatsoever, unless in one of the cases specified in this article. In such a case, the liability of the seller will be limited to no more than the amount of the invoice. In no event, whatsoever, shall the seller be liable for any form of consequential damage, loss of turnover or loss of profit.

2. The seller is not liable for damages due to force majeure as indicated in article 7.

3. All liability regarding non-timely delivery by the seller is hereby excluded, unless the agreed delivery date referred to in article 5 part 2 is exceeded by more than seven days. If the delivery date is exceeded by more than seven days, the seller must be given written notice of default, whereby the buyer must set a reasonable period for the seller to fulfil his obligations as yet.

4. Compensation in the event of a complaint can only take place if the complaint, submitted in accordance with article 8, proves to be justified and provided that there is a conscious negligence on the part of the seller. Moreover, the compensation shall be limited to the part of the delivered goods to which the complaint pertains.

5. In the event of a partial failure of the cultivation at the buyer as a result of the delivered products, then, if the seller is required to pay compensation for damages by virtue of part 4 of this article, the compensation of damages payable by the seller shall not exceed the percentage of the invoice value that equals the portion of the cultivation that failed at the buyer. If, when the damage is reported, the seller and the buyer jointly determine or a third party determines the percentage of deviating, diseased or weak plants, this percentage will determine the seller's maximum liability.

6. The buyer may not deduct damage compensation from any outstanding amounts payable to the seller and damage compensation does not entitle the buyer not to pay the invoice amount or not to pay this timely.

7. Both parties are obliged to ensure that any damage is limited as much as possible.

8. Each possible claim regarding compensation for damages pursuant to these General Terms expires, if and as soon as one year has passed since the delivery of the products in question when the claim has not been submitted to the seller in writing.

9. Any possible guarantees/warranties on the part of the seller will expire if the buyer of the products processed or has them processed, repackages or has them repackaged or has used the products incorrectly.

10. Product photos on the seller's website are provided for illustrative purposes only. No rights can be derived from the use of these photos. Photos can only be used to illustrate the original seller's varieties. All copyrights remain with the seller.

11. All description or information given, is without any commitment or liability whatsoever.

Article 10 Transfer of ownership

1. Except for the terms of part 2 of this article, ownership of the products is transferred to the buyer at the time of delivery under article 5 of these General Terms.

2. All delivered and to be delivered products, and the products arising therefrom, irrespective in which stage of the cultivation process, remain the sole property of the seller, until all claims that the seller has or acquires towards the buyer, including in any case the claims specified in Book 3, Section 92.2 of the Dutch Civil Code have been paid in full.

3. As long as the ownership of the products has not been transferred to the buyer, the buyer may not pledge the products or grant any other right to these products to third parties, except within the context of his normal business operations. The buyer undertakes upon the seller's first request to cooperate in establishing a pledge right on the receivables that the buyer acquires or shall acquire following the delivery of the products to his customers.

4. The buyer is obliged to store the products that have been delivered subject to retention of title with the necessary care and in such a manner that the products can be identified by the seller.

5. The seller is entitled to repossess the products delivered subject to retention of title and that are still located at the buyer if the buyer is in default with regard to the fulfilment of his payment obligations or is experiencing payment difficulties or threatens to experience payment difficulties. The buyer shall grant the seller free access to his premises and/or buildings for the inspection of the products and/or in order to exercise the seller's rights. If there is any doubt in the mind of the seller regarding the ability of the buyer to pay, the seller will be entitled to defer performances until the buyer has provided surety for the payment. If the buyer has not provided surety for the payment within fourteen days after being ordered to do so, the seller is entitled to terminate the agreement by cancellation. In this case, the buyer will be liable for the expenses incurred by the seller.

Article 11 Applicable law

1. Dutch law applies to all agreements to which these General Terms apply in whole or in part.

2. All disputes regarding or arising from the agreements concluded between the seller and the buyer, to which these General Terms apply, can be settled by the Dutch court that is competent in the area in which the seller is established. In addition, the seller is entitled at all times to summon the buyer to appear before the court which is competent by law or by virtue of the applicable international convention.
